No. **3 - 81**

SUBJECT AREA: Air Forces

DISTRIBUTION: All PI's

TITLE/SIGNIFICANCE:

Soviet AKDS-70 Air Separation Plant for Producing Medical Oxygen

COMMENT: The AKDS-70 vehicle set, for producing oxygen for use by pilots, is composed of three pieces of equipment (compressor van, technological van, and diesel electric generator trailer). The compressor van has three vent/windows, the technological van has four vent/windows on the chamfer portion of the van which is mounted on a KRAZ 214/219 chassis. The generator trailer is as long as the van portion of the compressor unit and has a rounded roof.
